### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance:

The amendment filed on 4/17/2006 has been carefully considered in view of the specification and the drawings of this application with respect to the references of the record. Applicants' argument is persuasive. The references of the record either taken alone or in combination fail to teach or suggest that a PWM signal generating unit comprises a duty setting portion for setting a duty based on command signal, a phase difference setting portion for setting a phase difference based on said duty, and a PWM signal generating portion for generating the first PWM signals and the second PWM signals based on the duty and the phase difference, and the phase difference between the first PWM signals and the second PWM signals is configured to be changed according to the duty set by the duty setting portion. The references of the record also fail to teach or suggest a PWM signal generating unit comprising a reverser for generating reversal carrier signals in which the carrier signals are reversed, and a second comparator for generating the second PWM signals by comparing the reversal carrier signal with the command signals, and the first PWM signals and the second PWM signals are generated such that falling timing of one of the first PWM signals and the second PWM signals and rising timing of the other of the first PWM signals and the second PWM signals coincide with each other.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
